DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 15-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 15, 19-20, 22-25 recite the limitation "power of dedicated channels" on line 8.

There is antecedent basis problem for this limitation in the claim. Suggest correction: "power of the dedicated channels".

Claims 16-26 are also rejected under 35 U.S.C. 112, second paragraph, because they depend on claim 15.

Claim 27 recites the limitation "the synchronization channel" on line 6. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

3. Claims 15-27 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
4. Claim 28 is allowed.

Regarding claims 15, 27-28, Fitton et al. (US 2004/0028013 A1) teaches a communication system comprising: a plurality of common channels that include a primary common control physical channel (e.g., PCCPCH, see par. 33); a plurality of dedicated channels

(see par. 31, 33); and a synchronization channel (e.g., SCH, see par. 33); wherein the primary common control physical channel and the synchronization channel are transmitted time multiplexed (see par. 33).

However, the closest prior arts, Fitton et al., Hwang et al. (US 2002/0077141), Iwamura (US 2003/064682), either alone or in combination, fail to teach wherein the transmit power of dedicated channels is reduced during the transmission of the synchronization channel, in combination with all of other limitations in the claims.
